# ASKONA MANUFACTURING FACILITY

the largest one among the manufacturers of goods for healthy sleep in Eastern Europe.

## PRIMARY PRODUCTION

- Polyurethane foam plant
- Polyester batting plant
- Coir plant
- Pocket spring unit manufacturing
- Tape and cardboard plant

## MANUFACTURING OF GOODS

- Mattress factory
- Bed factory
- Sofa factory
- Textile factory
- Modular cabinet furniture

## SALES OF PRODUCTS

- An extensive distribution network
- Export

## ADVANCED MANUFACTURING TECHNOLOGY

The largest 4-line conveyor system in Europe

In-house production of components

The facility area is over 160,000 sq.m.

## DAILY MANUFACTURING CAPACITY

**8,500**  
MATTRESSES

**1,200**  
PILLOWS

**600**  
BEDS

**400**  
SOFAS

### IN-HOUSE QUALITY LABORATORY

The only laboratory in Russia where mattresses are tested for strength, durability and other parameters.

### RESEARCH IN THE FIELD OF SOMNOLOGY

Together with doctors, we study the influence of sleep on human health and the quality of life. This research is taken into account when goods for healthy sleep are manufactured.

### RESEARCH OF CONSUMER PREFERENCES

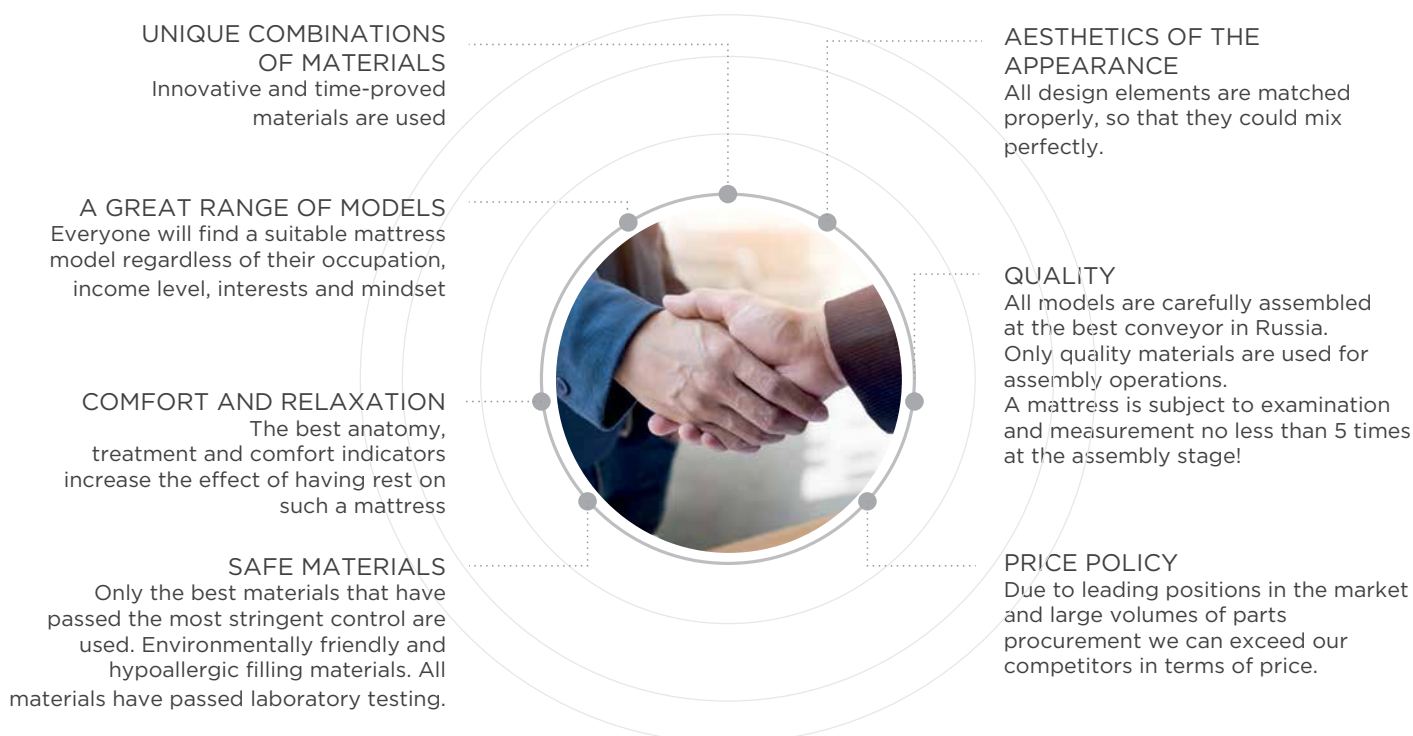

Regular marketing research allows offering the customer individual integrated solutions for comfortable and healthy sleep.

# IT'S EASY TO BECOME OUR PARTNER!

Over many years, Askona has developed a successful algorithm of beneficial cooperation with our partners. Use the opportunity to create and promote your own business together with #1 company in Russia!

- 1 Askona offers several mattress lines that have already proved to be effective. Each collection has obvious benefits and a sustainably high demand
- 2 Guaranteed sales: B2B and B2C collections for any demand
- 3 Individual approach and special orders production are available
- 4 High turnover and profitability
- 5 A flexible approach to procurement prices, a transparent discount system
- 6 Regular sales offers aimed at maintaining a constantly stable demand
- 7 Design support
- 8 Warehouse-to-warehouse wholesale; the product range of more than 1,000 SKU
- 9 Professional expertise on the product development
- 10 A consistently high quality of products, extended warranty

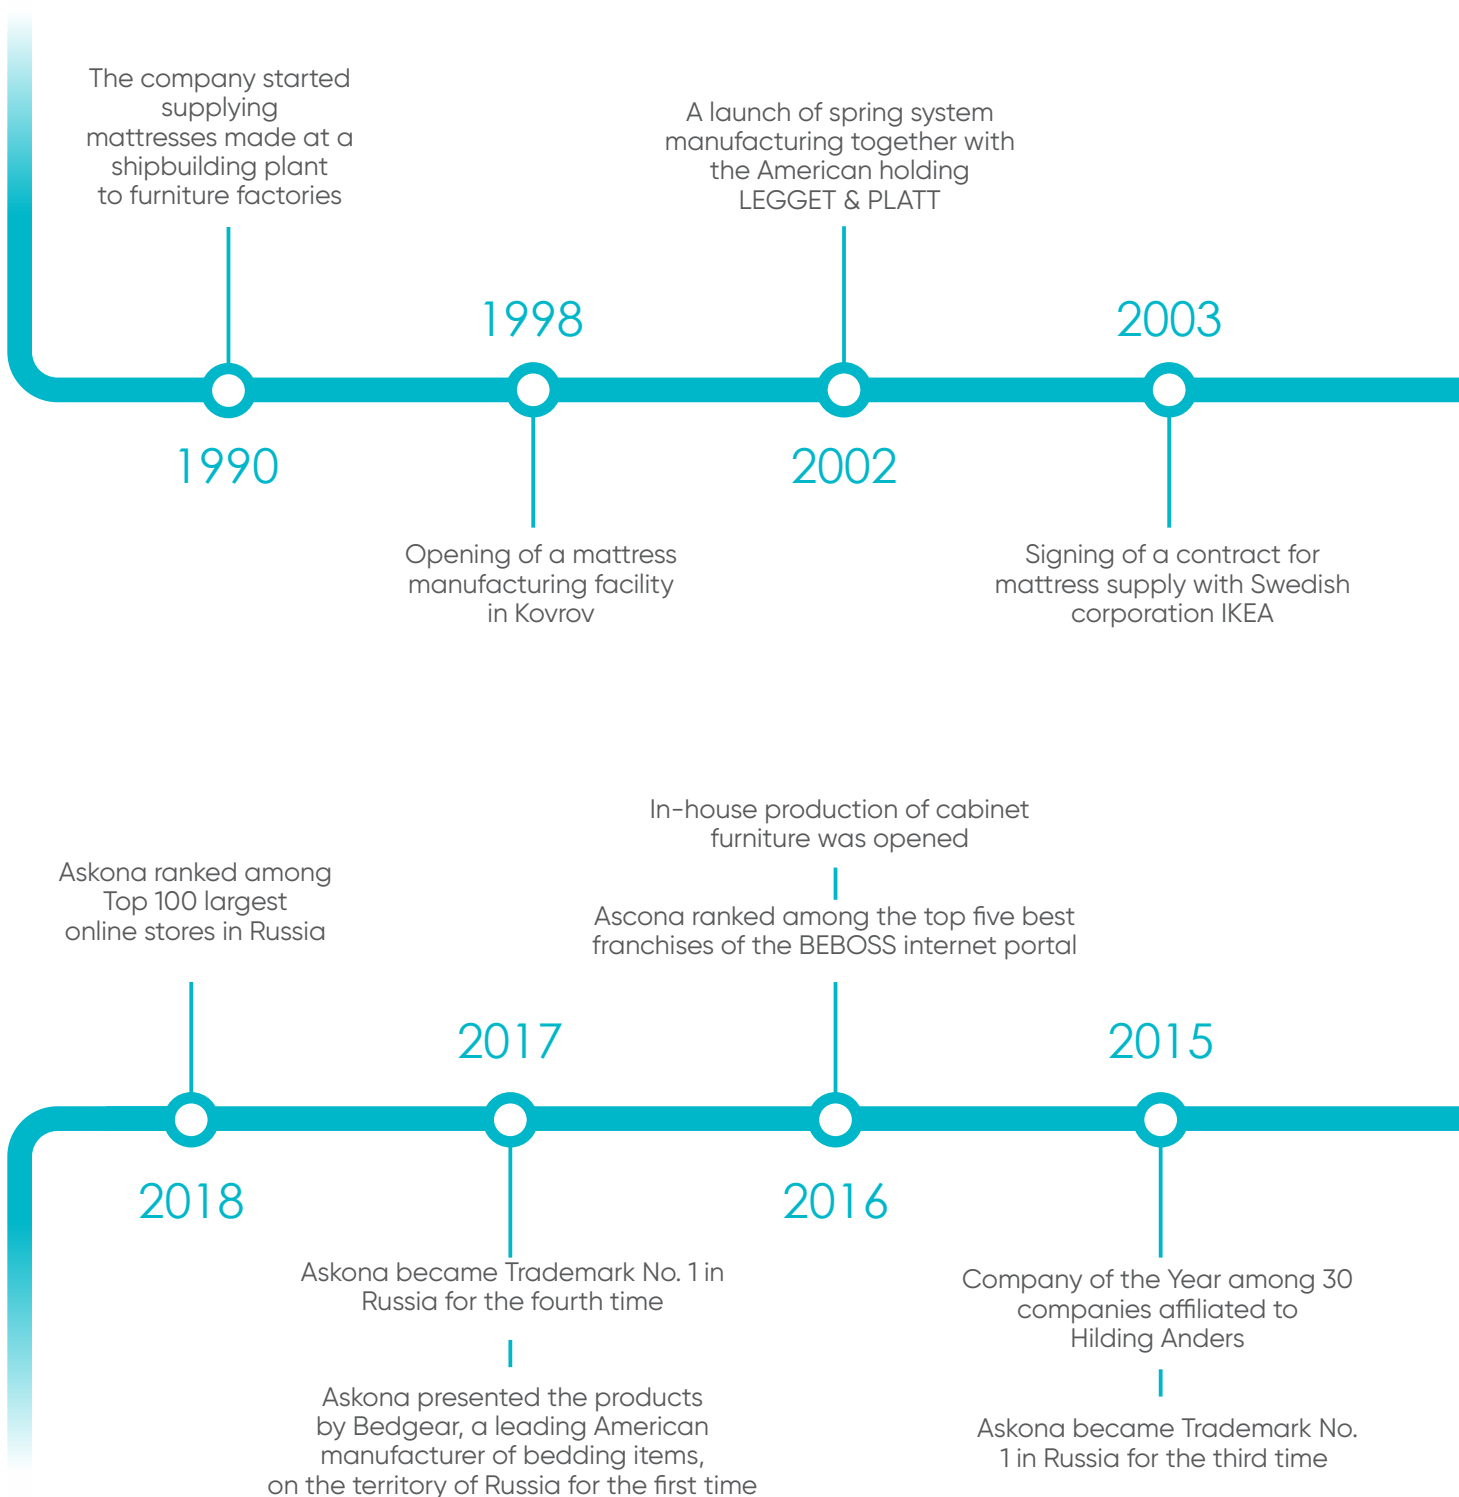

## COMPETITIVE ADVANTAGES

# HISTORY OF COMPANY

ASKONA IS THE RUSSIAN LARGEST VERTICALLY INTEGRATED RETAILER THAT SPECIALIZES IN MANUFACTURING THE ENTIRE RANGE OF PRODUCTS FOR HEALTHY SLEEP: MATTRESSES, BEDS, SOFAS, CABINET FURNITURE, GADGETS AND OTHER ACCESSORIES.

## OUR MISSION

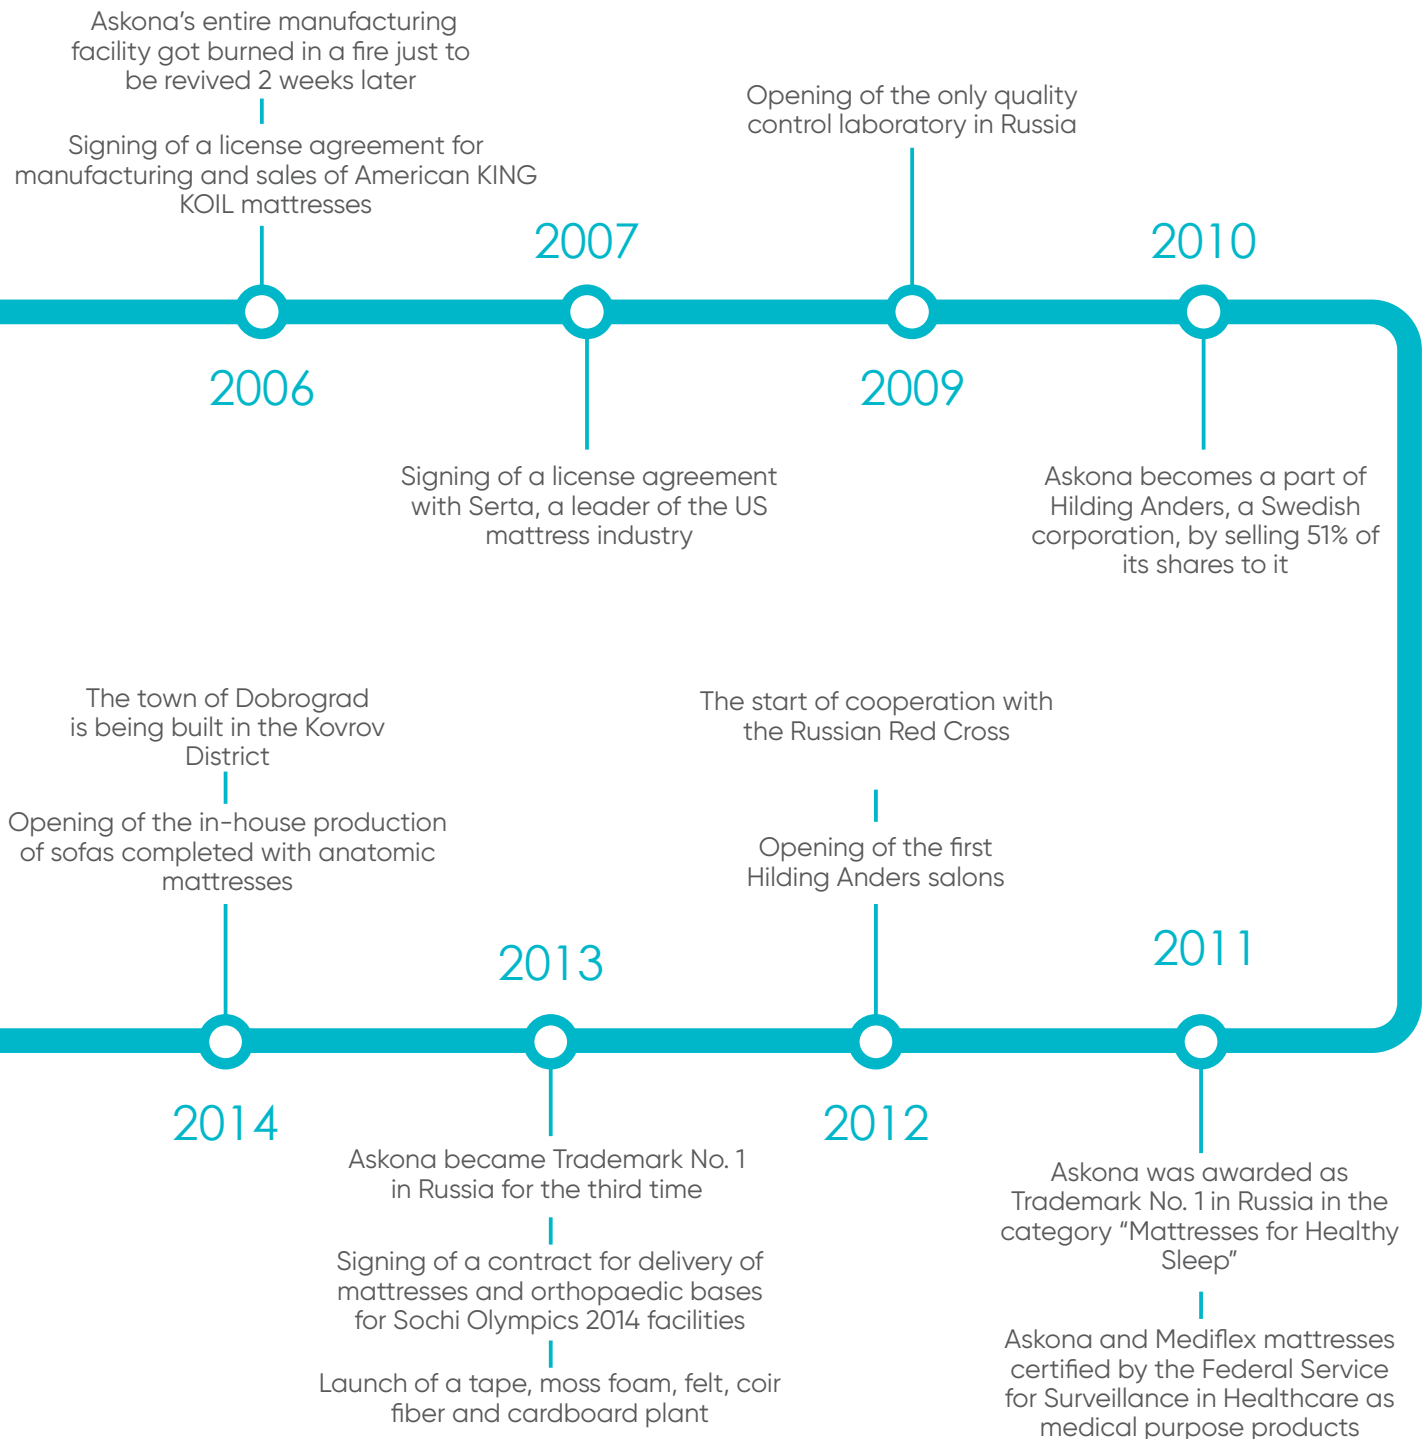

We strive to make a person happy and healthy, giving strength and energy for the realization of his dreams

## OUR VISION

We are an internationally recognized expert brand in the field of generating individual spaces and the atmosphere for healthy sleep

## OUR VALUES

- Concern for the individuals
- Leadership
- Innovativeness
- Competence
- Transparency

Spring blocks used in Askona mattresses are made of consistently high-quality wire using modern equipment.

The wire is subject to thermal and special anticorrosion treatment (hardening) at the manufacturing facility under a strict quality control in accordance with the request of Askona.

To maintain a consistent quality of products the Askona spring manufacturing organizes a multi-stage income quality control of raw materials and goods.

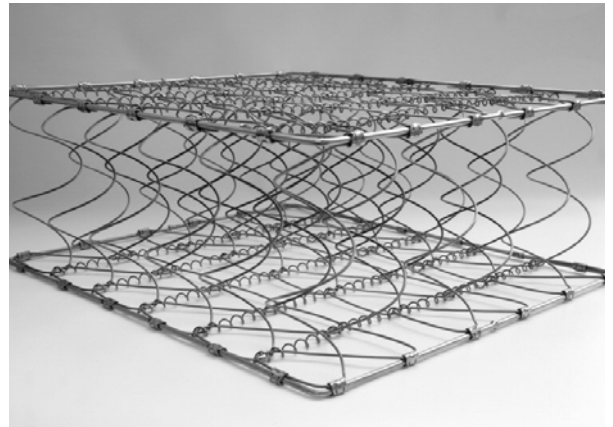

Each batch of wire is to be tested for rip, wrench, stratification and spinning ability.

Besides, springs undergo the normalization procedure at the Askona manufacturing facility (removal of residing tension after twisting) which guarantees consistent quality and a long lifecycle of spring blocks.

## BONNEL SPRING BLOCK

A classic spring block. Due to its design features it provides the best possible support and ensures even distribution of the human body weight across the surface of the mattress.

## TFK INDEPENDENT SPRING BLOCK

The spring block has special ergonomic and mechanical property. It consists of barrel springs each of which is placed in a closed bag and doesn't have any metallic connections with others. Compression of each spring in a block occurs independently of adjacent springs, so there is no "wave" effect.

## MULTIPOCKET INDEPENDENT SPRING BLOCK

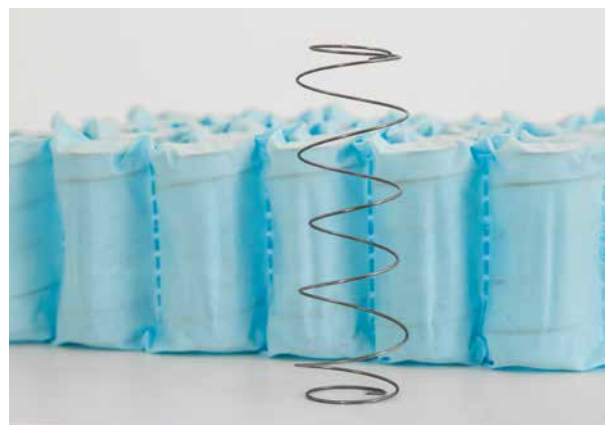

The MultiPocket spring block comprises a large number of springs of a smaller diameter, each of which is located in a separate bag. Mattresses with such a spring block are very comfortable, since they support your spine better as if they followed the shape of your body due to a large number of springs. Unlike a standard TFK block they can endure a bigger load of up to 130 kg.

## SANDGLASS SPRING

A unique spring patented by Askona. An average spring is compressed pretty fast under pressure. The Sandglass Spring is compressed in three stages. At first expansion zones on top and at the bottom are compressed. The central part is compressed in the end – under the biggest load.

Usual springs are either rigid or weak. A Sandglass Spring can provide various sensations. Several levels of rigidness are concentrated in one spring at once to ensure universal comfort practically for any person.

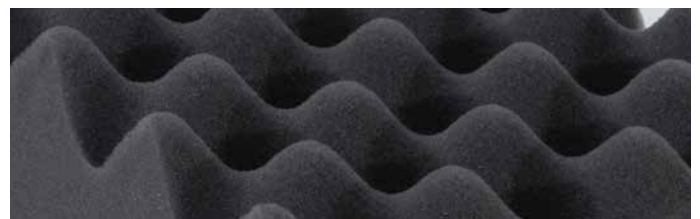

## ORTO FOAM

A highly elastic, hypoallergenic synthetic material with a double cell structure. The foam adjusts to the body anatomy in the most accurate manner to provide the perfect spine support and ensure a well-balanced microclimate for sleeping. The material is moisture-proof, non-toxic and can endure heavy loads for a long time.

## A FOAM WITH A MASSAGE EFFECT

It ensures air circulation inside the mattress by creating air pockets in cells. The massage effect is achieved due to protruding parts of a cell and provides softness and comfort.

## CARBON FOAM

A safe and solid filling that adds to the softness of a mattress. Reshape easily, ensures air exchange inside the mattress and has an anti-bacterial effect.

## ORTO FOAM WITH A GREEN TEA PROOFING

A highly elastic, hypoallergenic synthetic material. It adjusts to the body anatomy in the most accurate manner to provide the perfect spine support and ensure a well-balanced microclimate for sleeping. A green tea proofing has a favorable effect on the skin tone and protects it from premature ageing.

## MEMORY FOAM

A modern material initially designed for the space industry. It's elastic and has a unique "memory" property – an ability to follow the shape of a human body and keep it for some time. Besides, it has antimicrobial characteristics.

## COIR

A filling made of compressed coconut fibers treated with a special compound based on natural latex. It's extremely resistant and durable and adds to the rigidity of a mattress.

## SISAL

The material is made of agave plants leaves. It doesn't conduct static electricity. The material is solid and durable.

## MOSS FOAM

A non-woven synthetic canvas made of polyether fibers. It neither generates dust nor causes allergy. It adds to the volume of the mattress upper point.

## FELT

A strong and resilient material made of natural raw. It serves as a rigid insulating layer between springs and a soft filling.

## WHITE FELT

Felt is made of cleaned cotton raw; it's very thick and durable. It spreads the pressure across the surface of the spring block.

## HOLLOWFIBER

The hypoallergenic material consists of unique hollow spiral fibers. Its structure ensures great resilience and durability. Without absorbing smells or dragging dust, it preserves hygienic cleanness for a long time.

## LINEN

Heat-bonded 100% linen is an environmentally friendly material which excludes the possibility that the mattress contains formaldehyde. Linen derives moisture, creates a useful microclimate and neutralizes smells.

## SPUNBOND

A non-woven synthetic canvas of high density. It adds to the material's strength and protects softer layers from abrasion caused by a spring block.

## LATEX

A porous, resilient, durable material. It is made of a hevea rubber tree foamed juice. Thermally stable, with an antiseptic power. It minimizes reverse pressure on soft body parts.

## ASKONA BALANCE MATTRESSES ARE THE BEST POSSIBLE SOLUTION FOR THOSE WHO PREFER A HIGH QUALITY AT A REASONABLE PRICE.

Askona Balance mattresses – now comfortable and healthy sleep has become even more affordable.

The mattress chosen correctly is a prerequisite of health, success and prosperity. Askona Balance mattresses meet all the requirements in terms of environmental friendliness and safety, provide the maximal body adaptation and a required level of comfort. Askona Balance mattresses are the best possible solution for those who prefer a high quality at a reasonable price.

A well-balanced assortment of the Askona Balance Collection will allow everybody who prefers the most favorable price for the most worthy quality level to choose a mattress to their liking.

BALANCE MATTRESSES ENSURE COMFORTABLE SUPPORT OF YOUR BODY IN YOUR SLEEP DUE TO THE BEST POSSIBLE COMBINATION OF LAYERS IN THEIR COMPOSITION

**Jacquard**  
A thick mattress material. A special thread plaiting increases durability. Composition: 50% polyester, 50% thick synthetic fiber (Aerlan).

**A highly elastic foam**  
The foam adjusts to the body anatomy in the most accurate manner to provide the perfect spine support and ensure a well-balanced microclimate for sleeping.

**Coir**  
A filling made of compressed coconut fibers treated with a special compound based on natural latex. It's extremely resistant and durable and adds to the rigidity of a mattress.

## PRACTICE

A double-sided mattress

Height mm

Warranty for the mattress\*

Max load for 1 accommodation

Mattress rigidity

1. Moss foam padded jacquard
2. A highly elastic foam
3. Felt
4. Bonnel spring block
5. Mattress edge reinforcement

## PALMA

A double-sided mattress

Height mm

Warranty for the mattress\*

Max load for 1 accommodation

Mattress rigidity

1. Moss foam padded jacquard
2. A highly elastic foam
3. Coir fiber
4. Bonnel spring block
5. Mattress edge reinforcement

## SMART

A double-sided mattress

Height mm

Warranty for the mattress\*

Max load for 1 accommodation

Mattress rigidity

1. Moss foam padded jacquard
2. A highly elastic foam
3. Resilient spunbond
4. Bonnel spring block
5. Mattress edge reinforcement

\* An extended warranty for the purchase of a mattress with a cover.

## FORMA

 A double-sided mattress  
 Height mm: 170  
 Warranty for the mattress\*  
 Max load for 1 accommodation

1. Moss foam padded jacquard
2. A highly elastic foam
3. Felt
4. An independent spring block of enhanced reliability
5. Mattress edge reinforcement

## STATUS

 A double-sided mattress  
 Height mm: 190  
 Warranty for the mattress\*  
 Max load for 1 accommodation

1. Moss foam padded jacquard
2. A highly elastic foam
3. Coir fiber
4. An independent spring block of enhanced reliability
5. Mattress edge reinforcement

## LUX

 A double-sided mattress  
 Height mm: 190  
 Warranty for the mattress\*  
 Max load for 1 accommodation

1. Moss foam padded knitted fabric
2. A highly elastic foam
3. Felt
4. An independent spring block of enhanced reliability
5. Mattress edge reinforcement

## PRESTIGE

 A double-sided mattress  
 Height mm: 210  
 Warranty for the mattress\*  
 Max load for 1 accommodation

1. Moss foam padded knitted fabric
2. A highly elastic foam
3. Coir fiber
4. An independent spring block of enhanced reliability
5. Mattress edge reinforcement

\* An extended warranty for the purchase of a mattress with a cover.

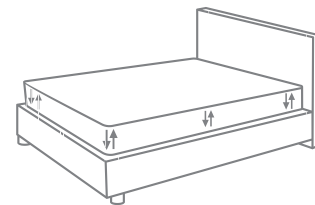

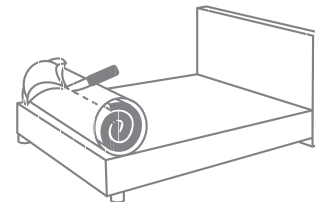

## ASKONA COMPACT – A MATTRESS IN A ROLL

To make transportation of mattresses to your home, summer house or to your relatives as a nice gift easier a collection of roll-packaged mattresses has been designed.

In a store a mattress looks like a roll, so that one can buy a mattress and take it home immediately. It's easy to transport it to the point of destination in a trunk of a passenger car.

As soon as the mattress package is opened, it returns to its original sizes soon ('unrolls'). Easy resize is possible due to the use of highly elastic materials as a mattress basis.

### EFFECT LOW

1. Put the rolled mattress along the edge of the bed, settle the fold of the mattress toward the center of the bed and cut the package.
2. Unfold the mattress and arrange it on the bed as per the scheme with its bend down.
3. Make a cut on the vacuum packaging – the mattress will recover and get back to its initial shape.

\* An extended warranty for the purchase of a mattress with a cover.

## A COLLECTION OF CLASSIC TIME-PROVED "SNOW WHITE" MATTRESSES

ASKONA TREND is created for people that appreciate traditions and prefer a classic style when it comes to the interior. They are not ready to spend a lot on a new mattress, and yet, they want to get a quality product and have healthy sleep.

## LINE

 A double-sided mattress  
 Height mm: 180  
 Warranty for the mattress\*  
 Max load for 1 accommodation  
   Mattress rigidity

1. Knitted fabric padded with highly elastic foam
2. Felt
3. The Bonnel spring block reinforced with two metal frames across the edge and polyurethane foam in the corners

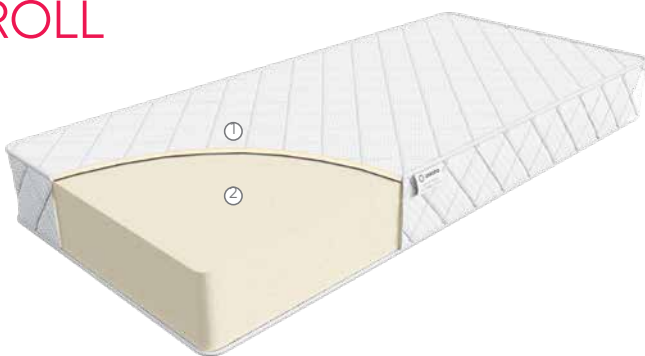

## LUCKY

 A double-sided mattress  
 Height mm: 200  
 Warranty for the mattress\*  
 Max load for 1 accommodation  
   Mattress rigidity

1. Moss foam padded jacquard
2. Coir
3. An independent spring block with springs of increased height
4. Edge reinforcement

## ROLL

 A double-sided mattress  
 Height mm: 160  
 Warranty for the mattress\*  
 Max load for 1 accommodation  
   Mattress rigidity

1. Moss foam padded jacquard
2. A highly elastic foam

 A mattress in a roll

## PRIME

 A double-sided mattress  
 Height mm: 220  
 Warranty for the mattress\*  
 Max load for 1 accommodation  
   Mattress rigidity

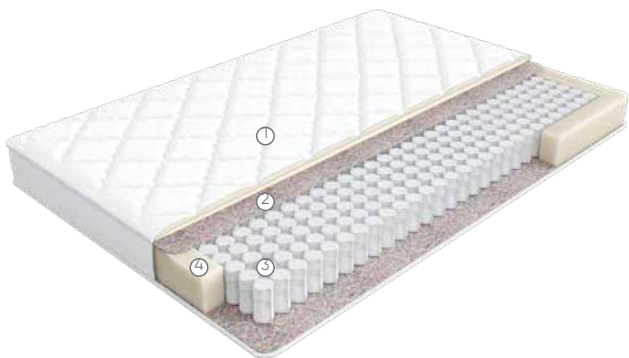

1. Knitted fabric padded with highly elastic foam
2. Coir
3. An independent spring block with springs of increased height
4. Edge reinforcement

\* An extended warranty for the purchase of a mattress with a cover.

## STANDART

 A double-sided mattress
  Height mm 160
  Warranty for the mattress\*
  Max load for 1 accommodation

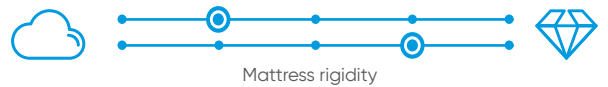

1. Highly elastic foam cotton jacquard
2. Felt
3. An independent spring block
4. Mattress edge support reinforcement system

## STANDART OPTION

 Many-sided mattress
  Height mm 180
  Warranty for the mattress\*
  Max load for 1 accommodation

1. Highly elastic foam cotton jacquard
2. Highly elastic foam
3. Felt
4. An independent spring block
5. Coir plate
6. Mattress edge support reinforcement system

\* An extended warranty for the purchase of a mattress with a cover.

## THE BEST COMBINATIONS OF MATERIALS AT AFFORDABLE PRICES

**CottonCare fabric proofing**  
Fabric proofing as a finishing touch for fibers restrains the growth of microorganisms on the fabric and serves as a protective barrier from pathogenic microorganisms and dust mites for the skin. It also has a self-purification property.

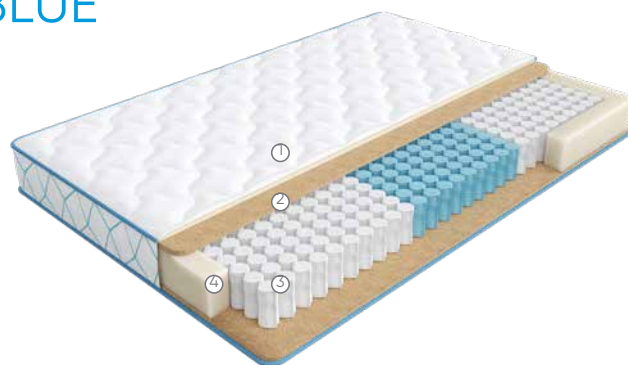

**OrtoFoam highly elastic foam**  
It's notable for improved air exchange in the comfort layers of the mattress, follows the body shape to reduce the "negative" reverse pressure on soft fabrics.

**Unique design**  
A combination of snow white fabric and a toise with a trendy geometric design.

## BLUE

A double-sided mattress

Height mm

Warranty for the mattress\*

Max load for 1 accommodation

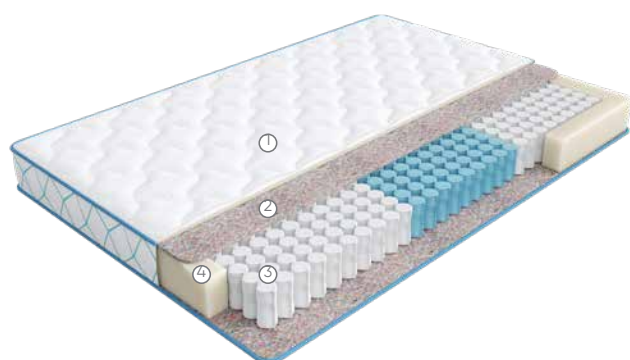

Mattress rigidity

1. Highly elastic foam padded bulky knitted fabric with a CottonCare proofing
2. Coir plate
3. A three zoned 3ZoneFlex spring block
4. Mattress edge support reinforcement system

## ICE

A double-sided mattress

Height mm

Warranty for the mattress\*

Max load for 1 accommodation

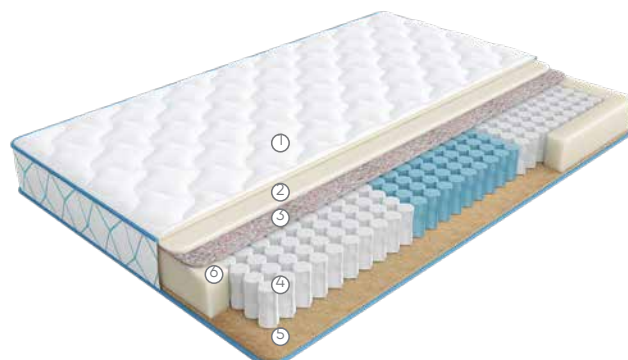

Mattress rigidity

1. Highly elastic foam padded bulky knitted fabric with a CottonCare proofing
2. Felt
3. A three zoned 3ZoneFlex spring block
4. Mattress edge support reinforcement system

## FROST

Many-sided mattress

Height mm

Warranty for the mattress\*

Max load for 1 accommodation

Mattress rigidity

1. Highly elastic foam padded bulky knitted fabric with a CottonCare proofing
2. OrtoFoam
3. Felt
4. A three zoned 3ZoneFlex spring block
5. Coir plate
6. Mattress edge support reinforcement system

\* An extended warranty for the purchase of a mattress with a cover.

**HOME SLEEP** MATTRESSES WILL GRANT YOU A SENSE OF SECURITY AND EMOTIONAL SATISFACTION, AND NATURAL MATERIALS WILL EMPHASIZE SPECIAL COMFORT

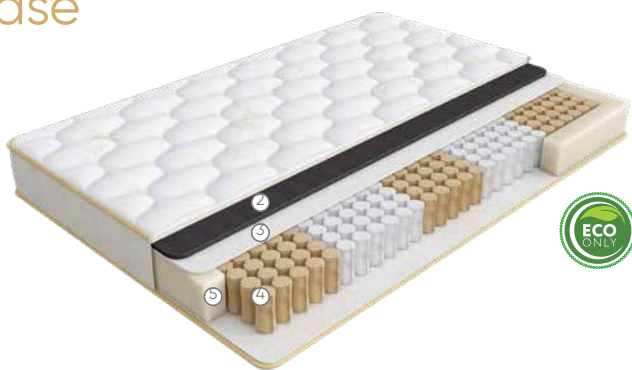

**CottonCare fabric proofing**  
Fabric proofing as a finishing touch for fibers restrains the growth of microorganisms on the fabric and serves as a protective barrier from pathogenic microorganisms and dust mites for the skin. It also has a self-purification property.

**FreeStat System**  
It reduces body tension intensively which leads to a decreased cortisol level and a deeper and more relaxed sleep.

6. Mattress edge support reinforcement system

## Viva

FOR COUPLES WITH A SIGNIFICANT WEIGHT DIFFERENCE.  
INDIVIDUAL RIGIDITY OF EACH HALF OF THE MATTRESS

This mattress is designed for family couples where partners prefer different mattress rigidity or for couples with a significant weight difference. Viva is a double-sided mattress based on unique combination independent pocket spring blocks. Such a spring block consists of two parts that divide the mattress into two halves: a soft one and a rigid one. Springs of different diameters are used in a soft half and a rigid one.

A double-sided mattress

Height mm

Warranty for the mattress\*

Max load for 1 accommodation

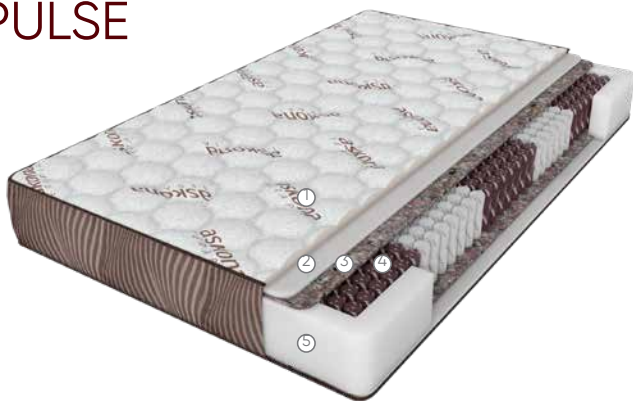

Mattress rigidity

1. Highly elastic foam padded knitted fabric with a CottonCare proofing
2. A highly elastic CarbonFoam with a micro-massage effect

## THE COLLECTION IS DESIGNED FOR THE PEOPLE THAT ALWAYS STRIVE TO STAY FIT

As scientific researches have shown, inadequate sleep leads to overeating and body malfunction which increases a risk of coronary vascular diseases, obesity and depression. A lack of sleep results in a sharp increase of ghrelin, the hormone responsible for appetite.

This discovery makes us have another look at the concept of a healthy lifestyle. If you want to be beautiful and lean, exercises and diets are not enough. It's very important to take care of the amount and quality of sleep.

The Askona Fitness collection is designed for the people that strive to stay fit.

A comfort system with a NANOTex proofing  
It restrains the growth of microorganisms on the fabric. It doesn't absorb surplus moisture and ensures a good ventilation at the same time.

Safe materials  
Environmentally friendly and hypoallergic materials are used.

Full relaxation during the sleep  
Only safe foam certified according to the European CertiPUR standard is used. No chemical agents

A seven zoned Fitness spring block  
The zones are based on Sandglass Springs that provide a solid support for heavier body parts

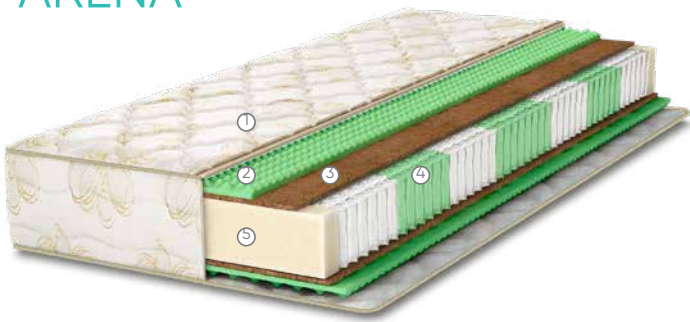

Askona Fitness mattresses have been successfully tested in the Quality Control Laboratory.

At the stage of assembly a mattress is subject to examination and measurement no less than 5 times!

## ARENA

 A double-sided mattress

## EXPERIENCE A TRULY LUXURIOUS SLEEP

Mattresses of the most famous American brand with 80 years of experience. A combination of aesthetics, noble materials and the cutting-edge technologies.

**SoftFeel proofing**  
It makes the fabric incredibly soft and luxurious.

**UltraSense comfort system**  
It increases air circulation for a perfect microclimate of the sleeping accommodation

**SoyaFoam, a foam of a new generation**  
It's a material of increased density and durability

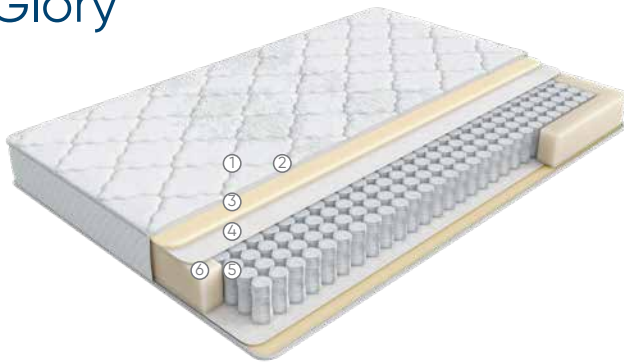

**A Serta Support System spring block**  
It's more resilient than other blocks and can endure a greater load due to increased spring compression.
